

## Triad MakerSpace

***“A makerspace is a metaphor for a unique learning environment that encourages tinkering, play, and open-ended exploration for all.” ~ Laura Fleming***

Community members, below is a list of some of the larger items we are trying to secure for our district MakerSpaces. Though we are starting with C.A. Henning, it is our goal to have Makerspaces in each of the elementary schools throughout the Triad district. For any donation that is made by an individual or organization, we will include a donation plaque on the item to recognize our community members' generosity. We look forward to working with you in building these amazing supports for our schools.
